# MATTHEW SEXTON

**IT SUPPORT | SYSTEMS ADMINISTRATION | CYBERSECURITY**

989-545-0428 | sx-jobs@notxes.com | notxes.com | Vassar, MI

## PROFESSIONAL SUMMARY

IT professional with hands-on experience supporting county government infrastructure, including Windows administration, Active Directory, endpoint deployment, and network troubleshooting. B.S. in Cyber Defense and pursuing an M.S. in Information Assurance. Operates a segmented cybersecurity homelab focused on network security and monitoring.

## TECHNICAL SKILLS

**Systems:** Active Directory, Group Policy, Windows Server, Windows 10/11, Linux, WSUS, MDT, imaging

**Networking:** TCP/IP, VLANs, Cisco switching, DNS, DHCP, VPNs, OPNsense, WireGuard

**Security & Infrastructure:** CrowdStrike Falcon, Security Onion, Zeek, Suricata, Wireshark, Nmap, Kali Linux, Proxmox

**Enterprise Tools:** Google Workspace Admin, Snipe-IT, Mitel, OnBase, PaperCut, Barracuda VPN, IBM i

## PROFESSIONAL EXPERIENCE

**Tuscola County | Help Desk Technician** Aug 2025 - Present

- Handled approximately **2,000 IT support tickets** across a county IT environment supporting **305 computers**, troubleshooting account access, software, peripherals, and network connectivity.
- Administer and troubleshoot Active Directory, Group Policy, Windows Server, DNS, DHCP, WSUS, and MDT, including accounts, device objects, policies, and domain integration.
- Deployed **200+ Windows 11 workstations** using MDT, configuring drivers, domain joins, software, TPM/Secure Boot, and post-deployment validation.
- Investigate VLAN, switch-port, DHCP, DNS, VPN, and endpoint connectivity issues to isolate faults and restore access.
- Deploy CrowdStrike Falcon to Windows endpoints; investigate security detections, assess suspicious activity, and take appropriate follow-up action.
- Administer Google Workspace through Google Admin Console, including user provisioning, organizational units, groups, and security settings.

## CYBERSECURITY HOMELAB & PROJECTS

- **Network segmentation:** Built a Proxmox, OPNsense, and Cisco-based lab with distinct management, Red Team, victim, Blue Team, and IoT VLANs controlled by firewall rules.
- **Security monitoring:** Configured Cisco SPAN traffic mirroring and Security Onion with Zeek/Suricata to support network visibility, packet analysis, and detection exercises.
- **Security testing:** Conduct reconnaissance, vulnerability scanning, and controlled exploitation practice using Kali Linux, Nmap, and Metasploit against isolated lab systems.

## EDUCATION

**Davenport University** | M.S. in Information Assurance, *in progress* | **Expected 2027**

**Davenport University** | B.S. in Cyber Defense, 2026 | GPA: 3.87, High Honors

## MILITARY SERVICE

**United States Marine Corps** | 2013-2017
